Our Flagship Solutions

FLEXERA SOFTWARE®

Corporate Software Inspector

Corporate Software Inspector

Corporate Software Inspector is an intelligent remediation solution for scanning software, and prioritizing and managing security patching. It is a unique combination of vulnerability intelligence from in-house research, software scanning, patch creation and patch deployment integration. Corporate Software Inspector has an inbuilt scalability and flexibility that can be tailored to customer requirements.

The integration between the Microsoft System Center 2007/2012 and Windows Server Update Services and Corporate Software Inspector makes it possible to manage all security updates from one console – including the non-Microsoft ones. Corporate Software Inspector Package System is available directly in System Center 2012 Configuration Manager and includes all pre-configured patches that come with Corporate Software Inspector.

FLEXERA SOFTWARE®

Vulnerability Intelligence Manager

Vulnerability Intelligence Manager

Vulnerability Intelligence Manager is a powerful software vulnerability management solution that facilitates effective reduction of the attack surface for cybercriminals, based on verified intelligence from Secunia Research, covering all applications and systems across all platforms. It drives prioritization by handling intelligence, workflows, tickets and alerts, and documents the steps to mitigate the risk of costly breaches. Our customers benefit from the expertise of our vulnerability research team who analyze the hundreds of potential vulnerabilities reported every day and deliver relevant and timely intelligence. Security teams and management have direct access to functionality using any device to continuously protect their critical assets.

Secunia Research at Flexera Software

In September 2015, Flexera Software acquired Secunia, adding Secunia's Software Vulnerability Management solutions to complement Flexera Software's Software License Optimization and Application Readiness solutions. Under Flexera Software, Secunia Research continues to perform vulnerability verification, issue Secunia Advisories and publish data on the global vulnerability landscape.

About Flexera Software

Flexera Software helps application producers and enterprises manage application usage and increase the value they derive from their software. Our next-generation software licensing, compliance, security and installation solutions are essential to ensure continuous licensing compliance, optimize software investments and future-proof businesses against the risks and costs of constantly changing technology. Over 80,000 customers turn to Flexera Software as a trusted and neutral source for the knowledge and expertise we have gained as the marketplace leader for over 25 years and for the automation and intelligence designed into our products.
